Abstract: Synonymical and distributional list of the Lepidoptera of Turkey I- *Tortricidae*. *Cent. ent. Stud., Priamus Suppl. 13*: 1-39, frontispiece.

In this publication, totally 457 species of the family *Tortricidae* found in Turkey are listed alphabetically. Synonymous names arranged chronologically are given to each species. Provincial distributions in Turkey are mentioned as codes and added to 365 species.

Keywords: *Lepidoptera Tortricidae* species list synonyms distribution Turkey

Within the frame of the scientific Project of the Cesa (DLW)¹, the Synonymical and Distributional List is a new serial of the *Lepidoptera* of Turkey. It comprises the scientific names of the species recorded in Turkey and the synonyms arranged in chronological order. The codes of the Turkish provinces are attached for each species, if this information accessible in the literature.

In the first part of this publication series, totally 457 species of the family *Tortricidae* hitherto recorded in Turkey are listed alphabetically. Synonymous names together with the authors and the date of publications are arranged chronologically and added to all species. Available distributional information are given to 365 species. As the provincial information are still lacking, other species are known only from Turkey. All the information submitted below are based upon the Info-System² of the Cesa.

The faunistic and taxonomical studies of the authors on the *Lepidoptera* of Turkey have been continuing. The results will be published in the serials of the Cesa at irregular intervals
